

I am writing in reference to the Rules & Regulations Implementing the Telephone consumer protection act of 1991 - CG Docket #02-278. I work for the teleservices company and am very concerned about the proposed rule changes and how they will limit my companies ability to operate. This could adversely affect my job and a number of co-workers as well. In these tough economic times with so many people losing their jobs, I can't afford to be another statistic. I feel we have enough laws already in place that should be enforced and crack down on the bad companies that exist at this time.
